

**Abstract:**

This invention relates to a semisolid ophthalmic composition, in particular an ointment, comprising (1) an ophthalmic drug, e.g. a staurosporine derivative, (2) an ointment base and (3) an agent for dispersing and/or dissolving said drug in the ointment base, selected from a polyethylene-glycol, a polyethoxylated castor oil, an alcohol having 12 to 20 carbon atoms and a mixture of two or more of said components.
